Summary

A frontend-focused web developer with over 4 client projects delivered across PHP, React.js, and WordPress during my internship at Syntax World. I'm currently developing a PHP + MySQL authentication system with role-based sessions and BCrypt password hashing. My portfolio showcases a macOS-inspired design that achieved high Lighthouse scores in performance and accessibility

Projects

PHP + MySQL Auth System

05/2026

Building a PHP + MySQL auth system with role-based sessions

- Role-based sessions: Admin (per-visit) and User (persistent until logout); BCrypt password hashing
- MySQL users table with structured schema; client-side Regex validation before data reaches PHP backend

macOS-Style Developer Portfolio
